## BABY'S ECZEMA GREW WORSE

Hospitals and Doctors Could Not Re-Here Disease—Cuticura Remedies a Speedy, Permanent Care.

"Eczema appeared when our baby was three months old. We applied to several doctors and hospitals, each of which gave us something different every time, but nothing brought rehel. At last, one of our friends recommended to us Cuticura Soap and Cuticura Ointment. A few days after-wards improvement could be noted. Since then we have used nothing but Cuticuraand Cuticura Ointment, and now the y is six months old and is quite cured. e used was one cake of Cuticura and two boxes Cuticura Ointment, 11:jn all \$1.25. C. F. Karn, 343 East reet, New York, March 30, 1906."

Turnip Tops As Medicine,

Turnip tops, as a diet for patients uffering with certain intestinal diss, is the unique treatment adoptfor experimental purposes at the Hopkins Hospital.

years old, of Williamson, W. Va., entered the Hopkins the early part of last month weak and ill from the disease. He was pale had lost much flesh and had suffered for several months. It was at the suggestion of his physician that he came to Raiimore, and when he entered the t to bed and under the ho on grew worse, one of the house cases. His physicians, Ashworth was put on the turnip greens treatment. It is the first case of this character ever so treated at the Hopkins, and the improvement in the condition of Ashworth has been rapid.

For the first two weeks

took four or five meals of tunip tops a day. His condition improved rethe treatment his dut will be increased by the addition of a glass of milk and toay. But as presut the patient sats nothing but tur-ip tops, while are gotten fresh

h hopes of rapid recovery of their The physicians are warnh-Ing the case with much interest.

## FUTURE WARS MAY BE FOUGHT IN AIR

To Be Settled With Minimum Loss of Life. Declares Major Squires.

New York City.-Brigadier-General James Allen, head of the Signal Corps of the United States Army; Major George O. Squiers, of the Signal Corps, and Admiral C. M. Chester, of the navy, were speakers before the International Aeronautical Congress in the house of the Automobile Club of America. The value of the airship in army and navy and the types best suited for the different branches of the service were set forward by the speakers, who are working on the problem on behalf of the American Gov-

General Allen said that the corps was building in Omaha a large aero-drome, 200 feet long, 100 feet wide and eighty feet high, where the 300 Signal Corps men stationed in the region will be trained. Later, he said, an aerodrome would probably be erected on the Atlantic coast and one on the Pacific coast. "We are more interested in the dirigible balloon than in the aeroplane," he said, "and shall make our gas by the electric process. The liquid air process has been tried, he said, but was not successful. General Allen said that he understood that Secretary Taft would ask Congress for \$200,000 for the prosecution of the work. A resolution was adopted asking President Roosevelt to intercede with Congress in behalf of the new branch of military activity.

"The practical dirigible balloon is here now," Major Squiers said. "The last great war was conducted strictly in line with the textbooks, accompanied at times with unlimited slaughter. The great object of war is to bring about a decisive result with a minimum destruction of human life. If we could utilize scientific principles to bring about this result without killing any one it would be the ideal. The cavalry is designed to scout and develop information for use in the handling and operation of the army which it serves. Aerial navigation furnishes us with an additional weapon for obtaining information and for using the information thus obtained. It will enable the maneuvring of armies by strategic marches and surprises to bring about decisive results with minimum destruction of life."

Admiral Chester, speaking for the naval side of the work, said that it Admiral Chester, speaking for the naval side of the work, said that it had recently come to light that balloons were used by the navies as well as by the armies involved in the late Russo-Japanese War. "Sufficient is learned from actual practice to substantile the theory that the airship is likely to become the long sought antidote against attacks from submarines," he said. "The elevation enables the observer to discover the movements of submarines under the water, and floating mines and stationary mines

"The dirigible balloon has been adopted by armies, but it is not profitable for general use on shipboard. Naval men should give their attention to the development of the aeroplane. It is peculiarly a naval weapon because of its compactness, the fact that on shipboard it would always be near a machine shop—a necessary factor in operating so delicate a piece of machinery-its adaptability for scouting purposes and the fact that it would have the power at hand for initial movement. An inclined plane on shipboard, but when the ship's own velocity is insufficient, turning her into the wind would give her own speed combined with that of the wind."

in his address as president of the Congress Willis 1. Moore reviewed the history of the development of aerial navigation and concluded that it was evident that the first application of the work would be in the and of "Commercially very little is to be expected from either balloons or flying machines," he said. "Upon the whole, now that success has come, that the conquest of the air has more limited practical uses than was imagined when it was not known how the process was to be achieved. but it may develop new uses of its own and prove an important benefit to

Weekly Review of Trade and Latest Market Reports.

COMMERCIAL COLUMN

R. G. Dun & Co.'s Weekly Re view of Trade says: There were fewer commercial failures in the United States this week than for two weeks past, reflecting the improvement of conditions as forecast in the reports received .- The fallures of the week numbered only 239, as against 273 last week, 252 the preceding week and 172 the corresponding week of last year. Another encouraging and satisfactory feature of the failure report is that only 76 of this week's failures involved liabilities of \$5,000 or more, as against 93 last week. The financial storm which broke on October, and which now seems weathered, as viewed by the returns for the first week of November, showed its effects in the liabilities of commercial failures during the month. They aggregated \$27,414,990, as against \$10,553,714 in October, 1906. Continuing, Dun's review will say

"Scarcity of money, unseasonable weather and the holiday combined to make the volume of business smaller than usual the past week, but the situation is more encouraging because of a general belief that the financial storm has been weathered remarkably well.

Leading industries are handicapped by lack of funds, and so many contemplated undertakings have been deferred that working forces are reduced, especially at steel milis. Prices of commodities have declined still further and exports should be increased thereby, but for the last week foreign commerce at New York showed a loss of \$2,512,691 in value of merchandise exported, as compared with the same week last year while imports gained \$165,061.

ODDS AND ENDS.

Great Britain's annual import of apples is nearly 9,000,000 bushels. Built early in the eleventh century, there are great cracks appearing in the north and south transepts of the Cathedral of Southwell Minster, England.

bacco crop pledged to the American Society of Equity in Henderson, Union, Webster, Hopkins and Crit-tenden Counties. The deal involves 16,000,000 pounds of tobacco and will bring \$500,000 in English money to the farmers of that section. The price is the highest ever paid, with the exception of the war price. The sperm whale can remain below the surface for about 20 minutes at a time. Then it comes to the surface and breathes 50 or 60 times, taking about 10 minutes to do so.

The average temperature of the year in England has risen just over a degree in the past half century. England has 144 churches for

every 100,000 people. In Russia there are only 55 churches for a similar number. Australasian wool exports this season will reach 2,000,000 bales, an increase of 200,000 bales over last season, and breaking all records. At William J. Clymer, under whose management the Columbus American Association Daseball League has won three successive pennants, signed a contract to manage the team next a baie this means \$15,000,000

"Money Madness."

By the Editor of Price Current.

Who is to blame for the craze for money, for the wealth which has brought about the present ill-feeling between the multi-millionaire on the one hand and the masses on the other? The answer must be that the masses themselves are to blame. Why? A little consideration will make that clear. To begin with, nearly all the great millionaires, the very wealthy men who are actively engaged in business, were either poor boys or the sons of men who began life poor. Their constant aim has been to acquire wealth, not only to acquire plenty of wealth but mora than anybody else had acquired before them, the more the better. Why? What has made such men money mad? Let that question be answered by asking another: In the United States, everywhere, among all classes in all conditions of life. is the cities, towns and in the country, what is the standard of success? What men and women are pointed out as having been most successful? Among all the retired business

men you know, which one do you count as having been most successful? The man who has piled up the biggest heap of wealth and at the same time kept out of the penitentiary. Which active business man is the most successful? The fellow with the biggest pile or who is likely to get the biggest pile. Who is the most successful lawyer or doctor? The one who gets the biggest fee. Who is the most successful preacher? The fellow who builds the costliest church or gets the biggest salary. Who is the most successful clerk or teacher? He who gets the most per week. What farmer is counted the most successful? He of the most acres or biggest bank account. Who is counted the most successful by his fellow workmen? The mechanic who gets the biggest wages. Why does one leave one trade, profession or business to enter another except in the hope of being more successful. Successful in what? In getting more money.

When he succeeds in adding more to his pile, however big or little that it may be, he gets the applause of bis fellows. Those who don't applaud him envy him. Throughout the whole of your life, who has always been pointed out as the successful man or woman in any and every walk of life? Has it not been he or she who has been getting the better price for what they had to give? By constant example and teaching by parents and teachers, and by the practice of the world, the young are taught from childhood, that money is the standard of success. They are taught to believe that people with money are better than people without it, that people with much money are better than those who have less. The rich and the poor and those in moderate circumstances act upon this principle.

It becomes and has long since become a part of the very nature of the American people, and it will take the teaching of generations to eradicate from the minds of the American that the size of one's pocketbook is not the real criterion by which to judge of success. This wrong standard by which to judge of success. This wrong standard by which the degree of success is measured is the cause of the present money madness and the American people themselves are to blame for this false standard. Each is determined to win as much of success as possible. The desire in life to win success is a commendable one, but the definition of the word is by no means what it should be, and until the conception of that standard is radically changed there is not likely to be any change in the swollen formes.

Dooley on Domestic Discipline. Mr. Dooley, in his recently pub-

lished "Dissertions," discusses domestic discipline in his own inimitable

"No gintleman shud wallop his wife, an' no gintleman wud. I'm in favor iv havin' wifebeaters whipped, an' I'll go further an' say that 'twud be a good thing to have ivry marrid man scoorged about wanst a month. As a bachelor man, who rules entirely by love, I've spint fifty years investigatin' what Hogan calls th' martial state, an' I've come to th' con-clusion that ivry man uses vilence to his wife. He may not beat her with a tableleg, but he coerces her with his mind. He can put a savage remark to th' pint iv th' jaw with more lastin' effect thin a right hook. He may not dhrag her around be th' hair iv her head. but he dhrags her be her sympathies, her fears an' her anxieties. As a last raycoorse he beats her be doin' things that make her pity him. An' th' ladies, Gawd bless thim, like it. In her heart ivry woman likes th' sthrong arm. Ye very sildom see th' wife iv an habitchool wifebeater lavin' him. Th' husband that gives his wife a vilet bokay is as apt to lose her as th' husband that gives her a vilet eye. Th' man that breaks th' furniture, tips over th' table, kicks th' dog an' pegs th' lamp at th' lady of his choice is seen no more often in our justly popylar divoorce coorts thin th' man who comes home arly to feed th' canary. Manny a skillful mandolin-player has been onable to prevint his wife fr'm elopin' with a prize-fighter."

Mistakes We Make.

Moths do not eat furs or cloths They lay their eggs in these rich stuffs, and it is the worms from the eggs that do the eating.

There are no shooting stars. Stars are immense bodies, many times larger than the earth, and they do not move. The so-called shooting stars that glide so splendidly across the noccurnal sky are meteors-fragments weighing, as a rule, but a few pounds.

Sunstroke is really heat apoplexy, it is the moisture in the air, rather than the actual rays of the sun, that cosh for Australasia. Shipments in the Unived States will total 100,000 such as Cairo's, with a summer tembales, a gain of \$0.000 bales over parature of 1224 crees in the shade.

STOP WOMAN AND CONSIDER

First, that almost every operation in our hospitals, performed upon women, becomes necessary because of neglect of such symptoms as Backache, Irregularities, Displace-ments, Pain in the Side, Dragging Sensations, Dizzincas and Sleepless-

Second, that Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, has cured more cases of female ills than any

other one medicine known. It reg-ulates, strengthens and restores women's health and is invalualing, preparing women for child-birth and during the period of Change of Life. Third, the great volume of unsolicited and grateful testimonials of file at the Pinkham Laboratory at Lynn, Mass., many of which are time to time being published by special permission, give about dence of the value of Lydia E. Pinkham's Vegetable Compound and Mr.

Lydia E. Pinkham's Vegetable Compound

For more than 30 years has been curing Female Complaints, such as Dragging Sensations, Weak Back, Falling and Displacements, Inflammation and Ulceration, and Organic Diseases, and it dissolves and expels Tumors at an early stage.

Mrs. Pinkham's Standing Invitation to Women

Women suffering from any form of female weakness are invited to write Mrs. Pinkham, Lynn, Mass. for advice. She is the Mrs. Pinkham who has been advising sick women free of charge for more than twenty years, and before that she assisted her mother-in-law, Lydia E. Pinkham is additionable to the charge of the ham in advising. Thus she is especially well qualified to guide sick women back to health. Write today, don't wait until too late.
